Ibrahim Hasan

Economics Researcher

Dhaka, Bangladesh | +880 1580 720848 | ibrahimhasandhaka@gmail.com

Academic Profile

Economics graduate and quantitative researcher with three years of academic, research, and project experience. Currently serving as a Research Assistant at ARK Foundation while pursuing an MSc in Applied Mathematics and Computational Studies. Experienced in preparing undergraduate teaching materials, supporting course delivery, assessing student work, and explaining quantitative concepts. Research interests include applied econometrics, health economics, labour-market outcomes, survey analysis, causal inference, and machine-learning applications.

Research and Teaching Interests

Applied econometrics; quantitative methods for economics; development economics; health economics; labour economics; public policy analysis; causal inference; survey-data analysis; and machine-learning applications in economics.

Education

MSc in Applied Mathematics and Computational Studies **September 2025–Present**
North South University *Dhaka, Bangladesh*
CGPA: 3.53. Relevant coursework: Data Science and Machine Learning, Computational Linear Algebra, Numerical Analysis, Partial Differential Equations, and High-Performance Computing.

Bachelor of Social Sciences in Economics **2025**
University of Dhaka *Dhaka, Bangladesh*
CGPA: 3.78/4.00. Relevant coursework: Econometrics, Real Analysis, and Dynamic Optimization.

Teaching Experience

Graduate Assistant **September 2025–Present**
North South University *Dhaka, Bangladesh*

- Prepare teaching modules and supporting materials for undergraduate courses.
- Assist faculty members with course preparation and delivery.
- Evaluate student performance through assignments and examinations.
- Respond to academic questions and help students understand quantitative concepts.
- Support research involving computational methods, data science, economics, and public health.

Research Experience

Research Assistant **October 2025–Present**
ARK Foundation *Dhaka, Bangladesh*

- Conduct quantitative and qualitative analysis for health, economics, and public-policy research projects.
- Analyzed WHO STEPS survey data from 6,987 participants to investigate physical activity, education, and inequalities in noncommunicable diseases.
- Applied multivariable logistic regression with cluster-robust standard errors to a study involving 433 adolescents across 15 schools.
- Supported data cleaning and analysis for the WHO EPI Coverage Evaluation Survey, covering 3,559 clusters and more than 25,000 households.
- Contributed to a consumer survey and discrete choice experiment concerning front-of-package food labeling.
- Prepare research reports, literature reviews, statistical tables, figures, presentations, and manuscript materials.

Additional Professional Experience

Core Team Member and Logistics Lead **2022–2024**
Silswa EdTech and Project Korikath *Dhaka, Bangladesh*

- Managed examination monitoring, scheduling, content curation, operational planning, and budget allocation.

- Coordinated educational events involving more than 200 participants.

Selected Research Projects

- **Education and Earnings Disparities** Used Household Income and Expenditure Survey 2022 data to investigate education and labour-market earnings.
- **Youth Employment Determinants** Applied logistic regression to examine socioeconomic factors associated with youth employment.
- **Machine Learning and Child Undernutrition** Used Bangladesh Demographic and Health Survey data to examine determinants of child undernutrition.
- **WHO STEPS Bangladesh 2022** Conducted causal mediation analysis of physical activity, education, and noncommunicable disease inequality.
- **Healthy Diet KAP Study** Analyzed data from 433 adolescents across 15 schools using multivariable logistic regression with cluster-robust standard errors.
- **Consumer Survey and Discrete Choice Experiment** Contributed to questionnaire design for an IDRC-funded household survey on front-of-package food labeling.

Academic and Technical Skills

Teaching support	Teaching-material preparation, assessment, examination support, student consultation, and explanation of quantitative concepts
Economics	Econometrics, labour-market analysis, health economics, policy analysis, and dynamic optimization
Quantitative methods	Logistic regression, multivariable modeling, causal inference, mediation analysis, cluster-robust estimation, and discrete choice experiments
Research	Survey-data analysis, literature reviews, evidence synthesis, questionnaire development, report writing, and manuscript preparation
Software	Stata, R, Python, Excel, and LaTeX
Communication	Academic writing, research presentations, data visualization, and communication of statistical findings

Academic Conferences and Engagement

- Contributor, 7th South Asian Economics Conference and 6th Bangladesh Economics Summit, 2024.
- Contributor, 6th South Asian Economics Conference and 5th Bangladesh Economics Summit, 2023.
- Research Team Member, ARK Foundation Bangladesh.
- Member, University of Dhaka Economics Department Undergraduate Alumni Network.

Languages

Bangla (native) | English (fluent, C1) | German (basic, A1) | Japanese (basic, A1)
